Forecast for Saturday 23 Jul 2022

Weather: Dry start to the day with perhaps some brief bright or sunny spells, but cloud will quickly increase bringing a chance for some patchy light rain, especially for western areas and over the mountain tops. Staying cloudy with perhaps some isolated brighter spells at times for eastern areas. This afternoon and especially this evening, the rain is likely to become more widespread, perhaps turning locally heavy across southern and western areas.

Chance of cloud-free hill tops above 600m: 100% lowering to 80% by mid-morning. Lowering to 20% for this evening.

Low cloud and visibility: Broken to overcast amounts of cloud with bases above summits move in during the first parts of the morning and will lower to 750 to 900 m in spells of rain. Cloud bases are expected to lower again this afternoon and evening, with broken or overcast cloud bases at 500-650 m. Generally good visibility, moderate at times in some spells of rain, poor or very poor in cloud over high ground.
